# DTMC

## Dynamic Talent Management Center

Precisely strategize talent deployment - grasp key talents in a second.

- Understand talent status, succession plan, resignation risks, and talents' willingness to rotate
- View the talent dashboard, talent pool, and essential positions
- Design succession plans using graphical representations of essential positions and charts

DTMC offers a systematic talent management solution that integrates internal human resources data. With its visualized dashboards, DTMC empowers managers to efficiently review human resources and swiftly identify key talents. This enables precise deployment of talent development strategies within the company.

Solution

# TERA

Improve efficiency, save costs, and strengthen team collaboration

Utilize data analysis and accounting tools to access pivotal sales, cost, and financial indicators

- Corporate ESG governance system
- Harness crucial financial and talent development data
- Empower business owners with critical decision-making insights

Solution

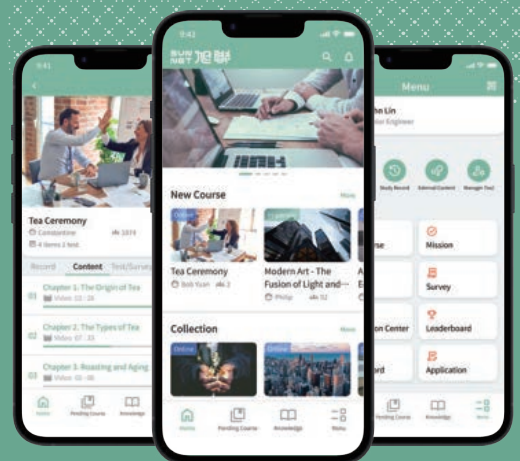

# CTMS

## Corporate Training Management System

CTMS expedites training program launches for companies, facilitating real-time employee learning, upskilling, and talent development strategy implementation.

- Design training strategies and understand needs
- Optimize user experiences using learning dashboard, rewards, and data
- Provide diverse modules such as organizational decentralization and mobile learning APP

Solution

# eHRD-U

The Talent Incubator for Your Enterprise

Let learning become the aesthetics of life

- Cultivate talents for your enterprise
- Ubiquitous, real-time, and effective learning
- Quickly access course resources

eHRD-U integrates CTMS functions, empowering learners with ubiquitous learning access and real-time progress tracking.

Solution

# khiKUN

The AI Conversation Engine for  
Your Enterprise

- ➔ Automatically generate test questions based on your text
- ➔ Support true/false, multiple choice, cloze, and essay questions
- ➔ Provide foundational training through tutoring, delivering relevant and valuable information within the enterprise

Solution

# Next-Generation

## The Smart LMS for Next-Generation

As the leading LMS in the Taiwanese higher education industry, our smart campus solution will offer the most flexible learning design environment encompassing activities, sharing, and internships, comprehensively enhancing mobility, socialization, and campus intelligence.

- ➔ DEI Design: A comprehensive upgrade to a friendly and barrier-free interface, offering great browsing experiences
- ➔ 360-Degree Evaluation: Enable evaluations by peers, classmates, and instructors using a user-friendly system with a rapid assessment tool.
- ➔ AI-Generated Questions: Enhance teaching and learning efficiency through automated question generation and instant feedback, reducing human resource needs in large exams.

Solution

# CPAS

Corporate Performance Ap-  
praisal System

Evaluate Employee Performances and Promote the  
All-Round Talent Development

- Fully and agilely support OKR, KPI, MBO, and CFR
- Detect problems and patterns, providing performance logs
- Implement value and comprehensive performance evaluation

CPAS streamlines process management to achieve corporate goals, shape core values, enhance communication, foster teamwork, and sustain talent evaluation and development.

Solution

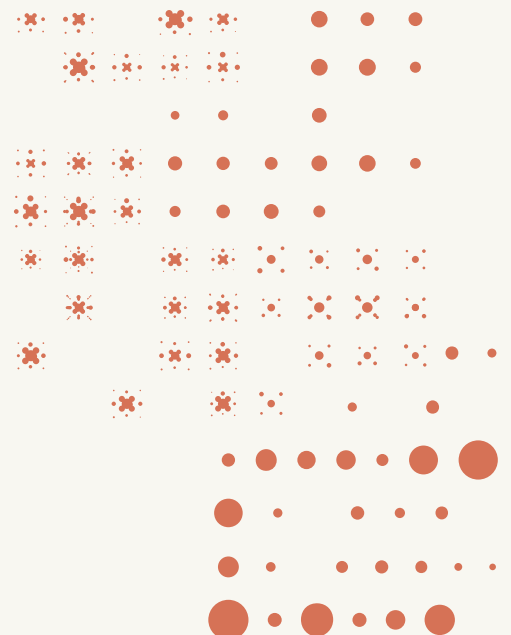

# CMCS

## Corporate Max Competence System

Precise gap analysis. Multidimensional reports

- Competency dictionary and categories
- Concise and convenient evaluation
- Career Development

CMCS offers a comprehensive 360-degree evaluation method aligned with your corporate culture, HR policies, and operational processes to assess employee competencies. The results inform talent recruitment and provide valuable competency insights, fostering organizational improvement and decision-making.

Solution

# CSAS

## Corporate Skill Assessment System

CSAS streamlines skill evaluations, mitigates risks through systematic processes, and facilitates adaptation to skill fluctuations, empowering strategic talent management.

.....  
Competency Assessment

Successor Selection

Career Development

.....

CSAS helps companies form competency groups by role, define skill levels, and identify individuals with required skills, enhancing efficiency in talent grouping and evaluation.

Solution

# TEMS

## Digital Productivity Tools for Small Enterprises

- Management by objectives: instantly understand the situation, communicate in real-time, and align goals
- Talent Development: foster internal talent to boost digital competitiveness
- Workforce Capability: using productivity tools to boost team operational efficiency

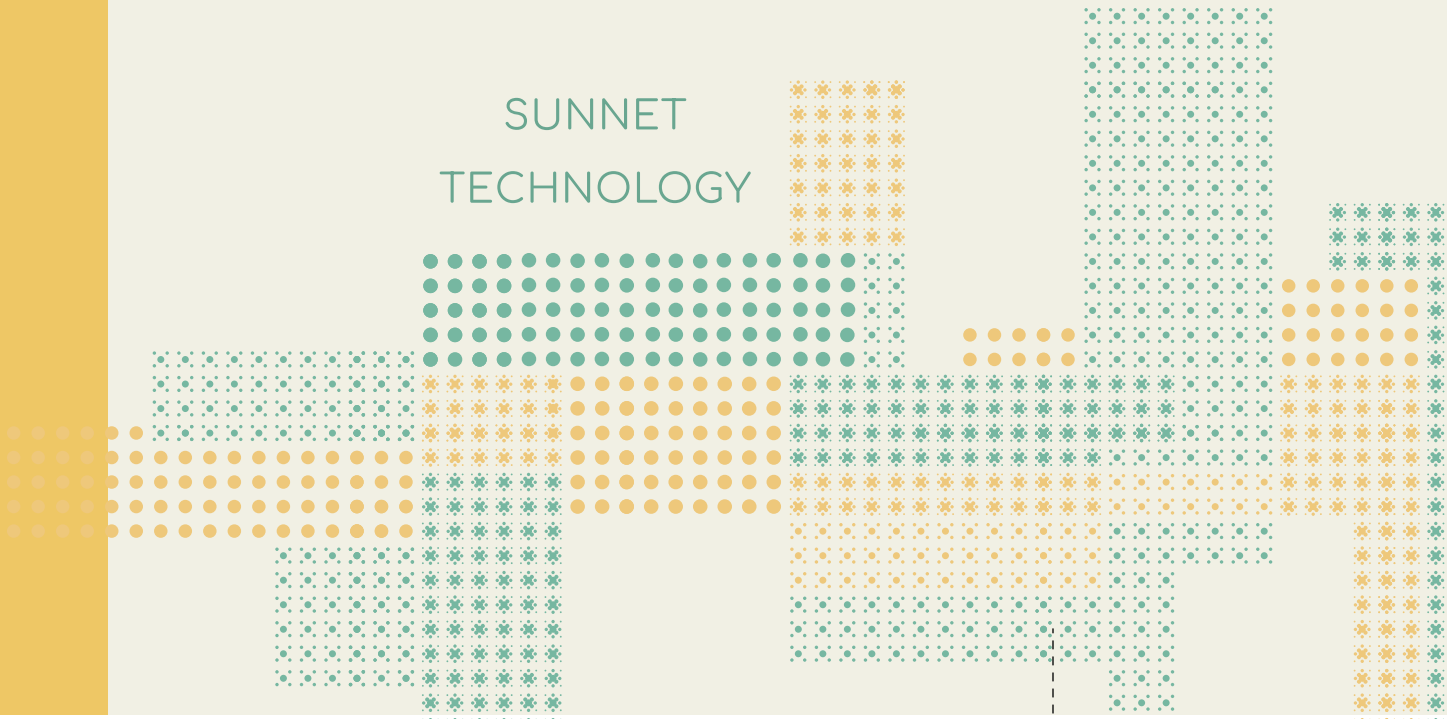

TEMS harnesses information technology's power to aid small enterprises in digital transformation, enabling them to fully leverage agility and flexibility, which are crucial to market success.
